

Novozymes TagTeam® Pea and Lentil Granular Inoculant

Two powerful technologies combined
to benefit your pea & lentil crop

TagTeam® Pea and Lentil Granular Inoculant combines the phosphate-solubilizing microbe *Penicillium bilaiae* with a specially selected nitrogen-fixing rhizobia. It can create more fixed nitrogen and improve access to the relatively immobile phosphate in the soil — helping to provide the best yield potential for your pea & lentil crop.

Benefits of using TagTeam® Pea and Lentil Granular Inoculant

- Enhances nutrient availability — including phosphate, which supports root and shoot growth, as well as nitrogen
- Improves fertilizer efficiency
- Greater opportunity for the development of nitrogen-fixing nodules
- Increases nitrogen fixation through nodule formation

How the technology works

1. Freeing Phosphate

Penicillium bilaiae releases bound mineral forms of soil and fertilizer phosphate, making it more available for the plant to use.

2. Beneficial Rhizobia

Specially selected rhizobia form a beneficial relationship with the plant, creating nodules which help fix atmospheric nitrogen.

Product details

Packaging may vary.

TagTeam® Pea and Lentil Granular Inoculant

Active ingredients	Packaging	Application rate	Case treats
1.3 x 10 ⁶ cfu/g <i>Penicillium bilaiae</i> 1.3 x 10 ⁸ viable cfu/g <i>Rhizobium leguminosarum</i>	40 lb bag	1.0 oz/1,000 ft of row	See table below

Always read and follow label directions

Application rates for TagTeam® Pea and Lentil Granular Inoculant

Row spacing	6.0 in	7.0 in	8.0 in	9.0 in	10 in	12 in	15 in
Application rate	5.5 lbs/ac	4.7 lbs/ac	4.1 lbs/ac	3.6 lbs/ac	3.3 lbs/ac	2.7 lbs/ac	2.2 lbs/ac
Area treated per bag	7.3 ac	8.5 ac	9.8 ac	11.1 ac	12.1 ac	14.8 ac	18.2 ac

About Novozymes

Novozymes is the world leader in biological solutions. Together with customers, partners and the global community, we improve industrial performance while preserving the planet's resources and helping build better lives. As the world's largest provider of enzyme and microbial technologies, our bioinnovation enables higher agricultural yields, low-temperature washing, energy-efficient production, renewable fuel and many other benefits that we rely on today and in the future. We call it Rethink Tomorrow.
