

Cell-Tech[®] Liquid

Soybean

Novozymes Cell-Tech[®] contains specially selected rhizobia that provide highly effective nodulation to enhance nitrogen fixation, even in cooler soils, increasing yield potential as planting conditions change.

FEATURES

2 x 10⁹ viable cfu/g *Bradyrhizobium japonicum*

Highly effective *bradyrhizobium*

On-seed or in-furrow application

Economical soybean inoculant

Broad compatibility with four days on-seed with most seed treatments

BENEFITS

- Supports early vigor
- Enhances nitrogen fixation
- Improves yield potential

APPLICATION RATE

2.1 fl oz/unit of seed (140k seeds)

4.2 fl oz/cwt of seed

In-furrow: 0.5-1.0 fl oz/1,000 feet of row

PACKAGING

4 x 50 units (4 x 104.8 fl oz)
