

New & Improved

Optimize[®] FXC DS

Soybean

Novozymes Optimize[®] FXC DS inoculant combines specially selected dual strain rhizobia and LCO to increase the rate of early nodulation and root and shoot development, which leads to a healthier crop and higher yields.

FEATURES

1 x 10¹⁰ viable cfu/g *Bradyrhizobium japonicum*
2.66 x 10⁻⁵% lipo-chitooligosaccharides

 **Highly effective dual strain *bradyrhizobium***

 **Powerful nodulation signaling molecule**

 **On-seed liquid formulation**

 **Broad compatibility with 120 days on-seed with most seed treatments**

 **NEW formulation with improved yield performance**

BENEFITS

- Vigorous root growth and shoot development
- Increases mycorrhizal associations
- Enhances nitrogen fixation

 **APPLICATION RATE**
0.75 fl oz/unit (140k seeds)
1.5 fl oz/cwt of seed

 **PACKAGING**
400 units;
5 x 2 x 40 units
