

QuickRoots® Multi-crop Planter Box

Corn

Novozymes QuickRoots® combines two microbes that work together to increase availability and uptake of nitrogen, phosphate, and potassium from soil to maximize your yield potential.

FEATURES

2.1 x 10⁸ viable cfu/g *Bacillus amyloliquefaciens*

5.0 x 10⁷ cfu/g *Trichoderma virens*

Planter box formulation for ease of application

Two living organisms in one product

Improves availability of nitrogen, phosphate and potassium

BENEFITS

- Enhances nutrient availability, which supports root and shoot growth
- Performance in a variety of soil conditions and types
- Increases yield potential

APPLICATION RATE

16 g /unit of seed

PACKAGING

10 x 25 units spout pack;
4.5 kg pail
