

Optimize[®] Gold

**Alfalfa**

Novozymes Optimize[®] Gold inoculant with LCO technology for alfalfa is used in combination with Nitragin[®] Gold. Together they employ multiple modes of action to enhance nitrogen fixation and improve nutrient availability.

FEATURES

1 x 10⁶ viable cfu/ml *Sinorhizobium meliloti*
1 x 10⁻⁷% lipo-chitooligosaccharides

 **Powerful nodulation signaling molecule**

 **Liquid formulation**

BENEFITS

- Vigorous root growth and shoot development
- Increases mycorrhizal associations
- Enhances nitrogen fixation
- Higher ROI through increased forage yield

APPLICATION RATE

1 bladder treats 1,500 lbs of seed;
1 case treats 3,000 lbs of seed (19.6 fl oz/cwt)

PACKAGING

2 x 2.3 gallon bladder
