

Novozymes TagTeam® BioniQ® Pro

– granular inoculant for pulses

Product overview

TagTeam® BioniQ® Pro is a next generation inoculant that combines four active biologicals. Through multiple modes of action, these biologicals improve nodule formation, increase nitrogen fixation and enhance efficiency of phosphate use. They also support availability of nitrogen, phosphate and potassium. These combined and complementary actions work to improve yield potential.

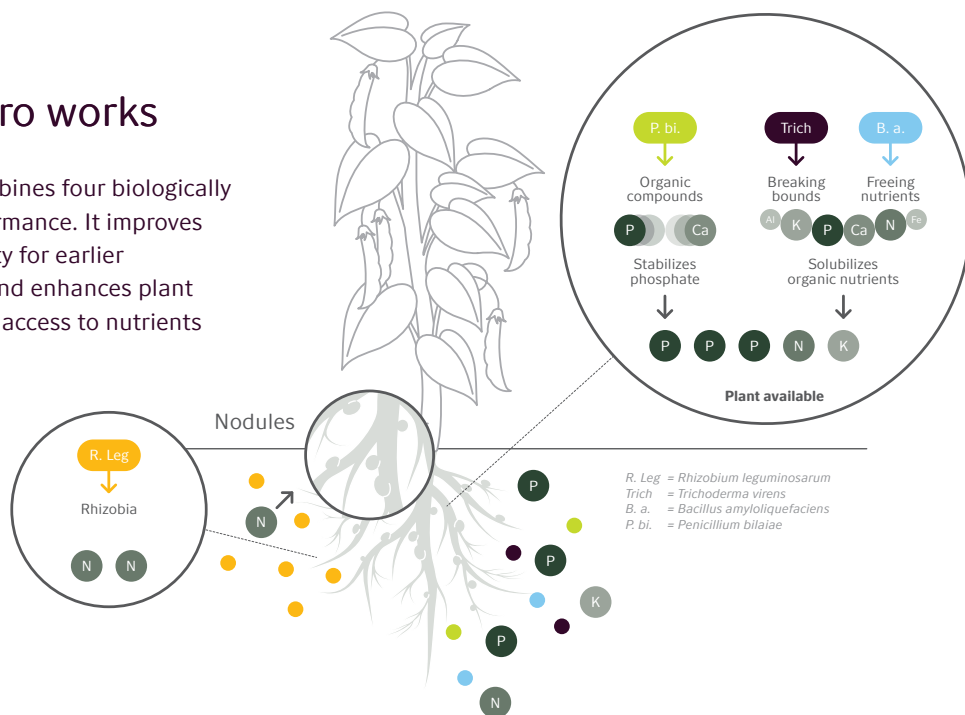

Features & benefits

Benefits of TagTeam® BioniQ® Pro

- Enhances N, P, K availability
- Increases efficiency of P use
- Enhances nitrogen fixation potential
- Improves yield potential
- Increases root growth and shoot development
- Supports early vigor
- Improves stress tolerance
- In-furrow

How TagTeam® BioniQ® Pro works

TagTeam® BioniQ® Pro for pea and lentil combines four biologically active ingredients for powerful in-field performance. It improves availability of NPK, allows a great opportunity for earlier nodulation and increased nitrogen fixation and enhances plant association with soil mycorrhizae, increasing access to nutrients and water.

About Novozymes

Novozymes is the world leader in biological solutions. Together with customers, partners and the global community, we improve industrial performance while preserving the planet's resources and helping build better lives. As the world's largest provider of enzyme and microbial technologies, our bioinnovation enables higher agricultural yields, low-temperature washing, energy-efficient production, renewable fuel and many other benefits that we rely on today and in the future. We call it Rethink Tomorrow.
